# 2003-2004 Mid-Year

# City Service Area Performance Report

Executive Summary & Detail Information

## Purpose and Scope:

To report on the status of the seven City Service Areas' (CSAs) progress toward strategic goals and service performance targets contained in their CSA Business Plans. This inaugural report covers actual performance for the prior fiscal year (2002-2003) and the first half of the current fiscal year (2003-2004).

Prepared By:
Office of the City Manager
March 2004

**Table of Contents** 

### **Executive Summary**

The **Executive Summary** section of this report includes graphic presentations of performance trends over time with brief narrative information on the "Key Messages" to be drawn from the reported data.

| City Service Area                   | Page |
|-------------------------------------|------|
| Aviation Services                   | 1    |
| Economic & Neighborhood Development | 5    |
| Environmental & Utility Services    | 7    |
| Public Safety                       | 9    |
| Recreation & Cultural Services      | 11   |
| Transportation                      | 15   |
| Strategic Support                   | 17   |

#### **Detail Information**

The **Detail Information** section of this report includes a comprehensive table of each of the seven City Service Area's performance measures, along with comparison of actual performance data to goals and targets for the time period covered by the report. Significant variances or other information are noted by the symbol or explanatory remarks.

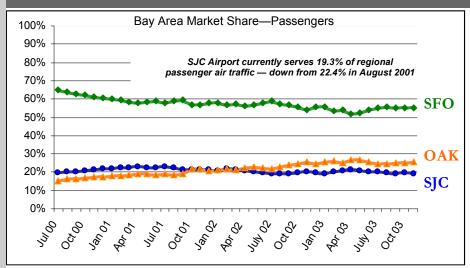

| City Service Area                   | Page |
|-------------------------------------|------|
| Aviation Services                   | 1    |
| Economic & Neighborhood Development | 6    |
| Environment & Utility Services      | 13   |
| Public Safety                       | 17   |
| Recreation & Cultural Services      | 21   |
| Transportation                      | 25   |
| Strategic Support                   | 29   |

# Aviation Services City Service Area

Mission:

To meet the air transportation needs of the community in a safe, efficient and cost effective manner.

#### Outcome 1: The Airport is the region's first choice for air transportation

"Our community has both reason to be optimistic about our future and concerned about staying ahead of our competition" San Jose Economic Development Strategy Nov. 2003

#### Key Messages

Implementation of the recently adopted Economic Development Strategy is focused on expanding the number and improving the health of businesses located in San Jose. The Strategy outlines steps to make San Jose more competitive by leveraging our assets such as the Airport and by investing in infrastructure that will make San Jose a **Global Gateway.** In thinking about the next five years, among the important considerations is the idea of **Value Proposition**. To stay competitive as a community, companies must perceive that the advantages of operating in San Jose—in terms of both productivity and creativity—outweigh the cost disadvantages. To this end our community must invest in infrastructure and services that increase productivity and help mitigate the cost of doing business.

A number of factors go into assessing a community's competitive advantages, chief among the factors are: air service destinations and frequencies, facilities and infrastructure to support both air service and direct customer needs, airport amenities, location, accessibility, and costs. While the Airport continues to work on air service development and marketing, Master Plan development, improved amenities including improved security processing, roadway and public transportation access improvements the most significant changes will occur with the development of the North Concourse Facility. Regaining a larger share of regional air passenger traffic will indicate progress toward improving the City's value/cost equation.

#### Outcome 2: Travelers have a positive guest experience while using the Airport

#### "New SJC Courtesy Carts hit the streets" October 2003

#### Kev Messages

The Aviation CSA seeks to insure that our customers experience reasonable and predictable travel (Outcome 2, Goal B). To this end the Airport has piloted a very successful Courtesy Cart program that provides transportation for those passengers that have difficulty walking the distance between the Terminal A Ground Transportation Center (GTC) and the terminal.

# Aviation Services City Service Area

#### Outcome 2: Travelers have a positive guest experience while using the Airport (Cont'd)

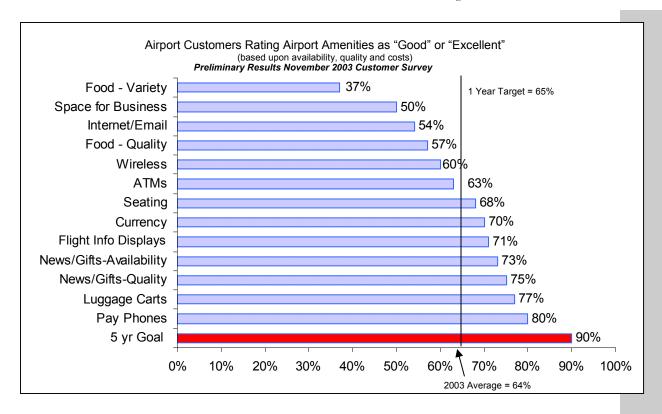

# "New checkpoint reduces wait during peak travel periods"

December 2003

#### Key Messages

Another factor associated with insuring that Airport customers encounter reasonable and predictable travel (Outcome 2, Goal B) is the availability of security checkpoint areas. The South Checkpoint in Terminal C was recently reconfigured to add a fourth security screening area and to bring the checkpoint into alignment with the TSA standard. Passengers flying on United, United Express, Continental, America West and Frontier Airlines go through the South Checkpoint to access their gate.

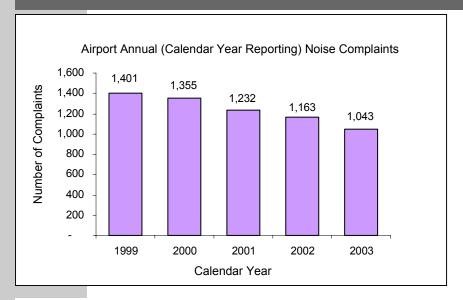

#### Key Messages

Airport facility and funding constraints have restricted various amenities offered at the Airport. The recently completed customer survey indicates an overall satisfaction rating of just 64%, which represents a 1% increase from the 2001-2002 survey in the number of customers rating Airport amenities as good or excellent, based on availability, quality and cost. The increase can be attributed to the various improvements that the Airport has been able to incorporate into the existing facilities, however there is much work needed to meet the five-year target goal of 90%.

The City's efforts to facilitate the development of the North Concourse, implementation of shared technology for services such as flight information displays (FIDs) and baggage screening systems, the RFP process for the Terminal A Burger Concept restaurant, and introduction of new customer service training are expected to increase customer satisfaction levels during the near-term.

# Aviation Services City Service Area

#### Outcome 4: The Airport is considered to be a "good neighbor" by the community.

"Airport noise complaints are down by 10.3% from 2002"

#### Key Messages

The Airport is committed to partnering with the community and one of the results of that partnership is the reduction in noise complaints over the past five years.

The development of a Community Outreach Program in the form of "Neighborhood Workshops", rapid response and effective reporting of complaints and community friendly tools such as the Airport Monitor and a retooled telephone management system provide interaction, education and resolution for the community on noise issues.

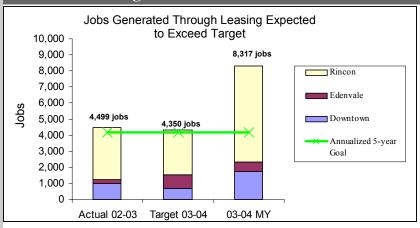

The Airport has also introduced reporting on the web, telephone access to a "live person" day or night, and a Noise Response Customer Satisfaction Survey. All of which work in conjunction with Quarterly Airport Noise Monitoring Meetings and detailed complaint resolutions available in the Airport Monthly Noise Report to help the Airport communicate and resolve various stakeholder issues that impact the community.

# Economic and Neighborhood Development CSA

#### Mission:

To manage the growth and change of the City of San Jose in order to create and preserve healthy neighborhoods, and ensure a diverse range of employment and housing opportunities.

#### Outcome 1 - Strong Economic Base

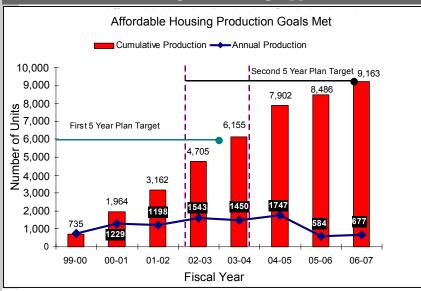

"The Tenant Improvement Incentive Program has helped us exceed targets for jobs generated in three key areas."

#### Key Messages

The implementation of the recently adopted Economic Development Strategy is focused on expanding the number and improving the health of driving industries located in San Jose. The program includes steps to make San Jose more competitive in areas such as improved permitting processes and new efforts to attract a wider variety of conventions. By helping facilitate business creation and expansion the City is taking concrete action to improve its financial position.

City efforts to facilitate leasing of vacant, existing building space in three Redevelopment Areas are expected to increase the number of jobs and tax increment. The economic assumption is that 1 job is created per 350 square feet leased. Currently, the goal of 4,350 jobs/year for 2003-2004 is being exceeded.

#### Outcome 2- Diverse Range of Housing Opportunities

"Over 9,000 units of new affordable housing anticipated in eight-year period."

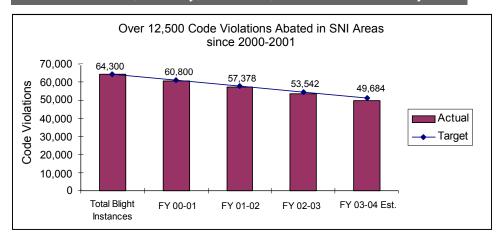

#### Key Messages

San Jose housing prices are among the highest in the nation, forcing many lower-income families to overpay for housing, live in overcrowded settings, or travel long distances to their place of work. Providing housing choices to people at all income levels helps ensure the City's long-term economic stability.

The City Council has adopted progressive policies and goals toward this end. This year (2003-2004), the City will meet the Council's five-year 6,000 unit construction completion goal for the development of new units of affordable housing. More than 3,500 additional units are expected to be completed over the next three years. While tax increment revenues, the main funding source for the affordable housing program, have declined, the City is investigating innovative financing methods to continue to produce affordable housing in the future. The chart above illustrates the drop in funding anticipated as a result of tax increment declines but shows the City's continued commitment to increasing affordable housing opportunities.

# Economic and Neighborhood Development CSA

#### Outcome 3 - Safe, Healthy, Attractive, and Vital Community

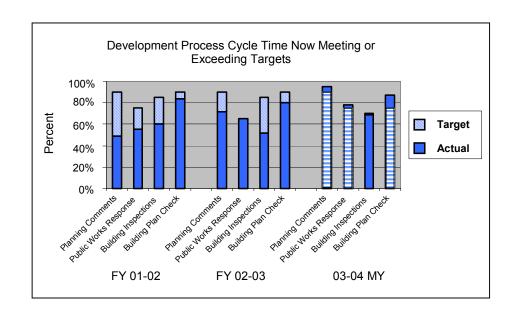

"Proactive code enforcement efforts by the "Driveway Team" are reducing blight in residential neighborhoods, but resource leveraging is necessary to deal with the volume of violations."

#### Key Messages

Code Enforcement activities focus on maintaining the built environment in a safe and attractive condition. Code Enforcement's proactive "Driveway Team" has an annual target of resolving 3,215 of the 64,000 blight violations identified in SNI areas and is on track to meet or exceed that target for 2003-2004. Reductions in instances of blight reflect an improvement in overall neighborhood quality. While the Driveway Team has been exceeding their annual target for resolving these cases, the volume of cases and the uncertainty of future funding makes it imperative that Code Enforcement leverage its resources by getting neighborhood groups to remain actively involved in reducing neighborhood blight through education and outreach.

The 2003 Community Survey results show 53% of SNI residents think their neighborhoods have gotten better over the last two years.

"Cycle-times for development process components are improving as efforts are made to make the process predictable for customers."

#### Key Messages

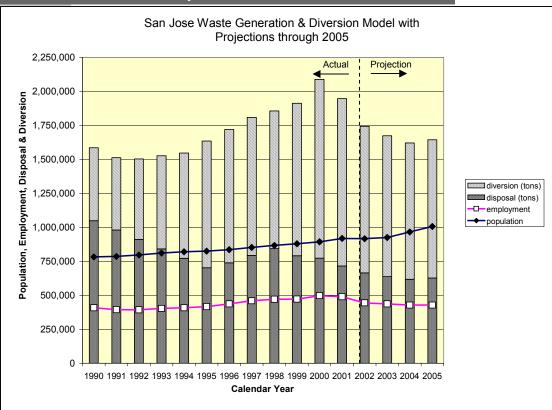

At mid-year, the development service partners are meeting or exceeding cycle time targets for 2003-2004. Project turn-around time in the components of the City's development process has been measured against standards based on the development community's preferred response times. These preferred response times have not been met in recent years, due to the City's inability to staff up fast enough for the development boom which peaked in 2002. Cycle-time performance improved in 2002-2003. In fee for service-level discussions with industry groups in the 2003-2004 budget process, targets for plan check and inspection were negotiated to meet customer expectations based on anticipated activity and the staffing levels supported by the fee increases.

# Environmental and Utility Services City Service Area

Mission:

Provide environmental leadership through policy development, program design and reliable utility services.

#### Outcome 1 - Reliable Utility Infrastructure

"San Jose's solid waste diversion rate of 64% is the highest for any large city in the country."

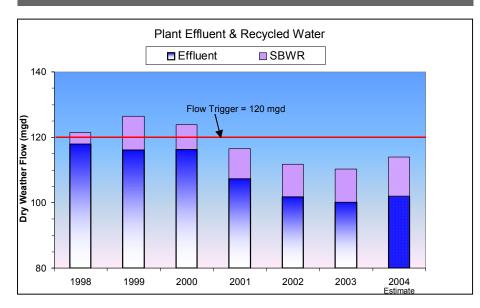

#### Key Messages

The California Integrated Waste Management Board certified San Jose with a 64% rate of material diverted from landfills for the year 2000. Data for 2001 and 2002 has been submitted to the state for certification but they have not yet acted. This remarkable achievement has been reached through visionary and innovative programs approved and supported by the City Council designed to enhance the sustainability of our community.

Total solid waste generation is driven by population, and the level of economic activity reflected in taxable sales and employment. The amount of material diverted is a direct result of a wide range of City and County programs. As material diversion levels increase, the General Fund fee and tax revenue associated with the handling, transport and disposal of solid waste has declined. Staff is investigating ways to address this issue by determining if an alternate fee and tax structure can be designed to promote diversion while maintaining a stable revenue stream.

# Environmental and Utility Services City Service

#### Outcome 2- Healthy Streams, Rivers, Marsh, and Bay

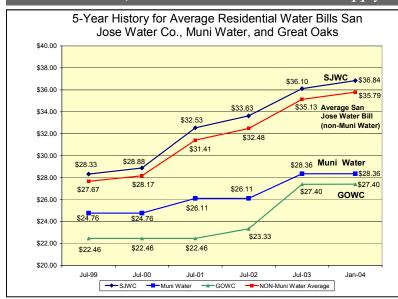

"The City's Recycled Water program helped avoid exceeding the flow trigger of 120 million gallons day in the late 1990's and helps position us for the next economic recovery."

#### Key Messages

Since its inception in 1998, South Bay Water Recycling has increased recycled water delivery annually, delivering over 10 million gallons per day (mgd) to 414 customers in the dry weather months during 2003. This trend is expected to continue as new customers are added to the system. The Metcalf Energy Center, which is scheduled to come on line in May 2005, will use as much as 4 mgd of recycled water for cooling during the summer months.

As a result of increased recycled water usage, a highly successful Water Efficiency Program, and a depressed economy, flows to the Treatment Plant have dropped significantly to their lowest point in ten years. This positions the City well for the next economic recovery when flow to the plant begins to increase again as well as for future development.

#### Outcome 4- Safe, Reliable and Sufficient Water Supply

"Due to continued operational efficiencies Muni Water rates remain below the average water bill of San Jose residents served by other water companies."

#### Key Messages

Despite increasing wholesale water and utility costs, the San Jose Municipal Water System (Muni Water) has minimized rate increases through the implementation of operational efficiencies over the years.

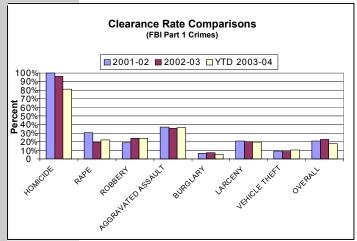

In compliance with the recently enacted Council policy, Muni Water rates are lower than the average water bill of San Jose residents served by other water companies. The average bill for Muni Water customers is \$28.36 compared to \$35.79 for the average of the other water retailers in San Jose.

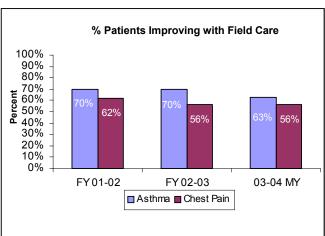

# Public Safety City Service Area

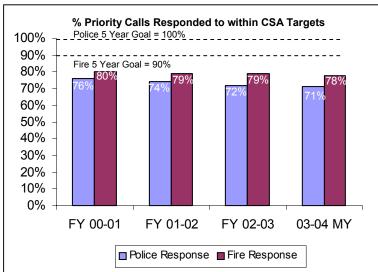

#### Mission:

Provide prevention and emergency response services for crime, fire, medical, hazardous and disaster related situations.

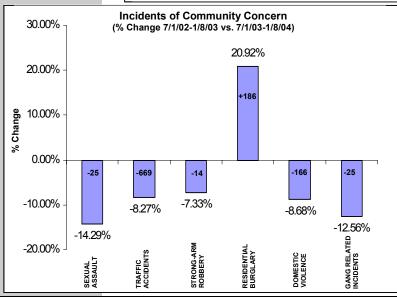

#### Outcome 1 - Public Feels Safe Anywhere, Anytime in San Jose

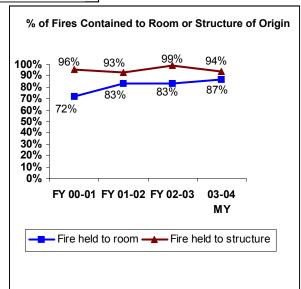

"The ability to meet established response time objectives is one of the standards for measuring our ability to deliver resources to better control or mitigate emergencies."

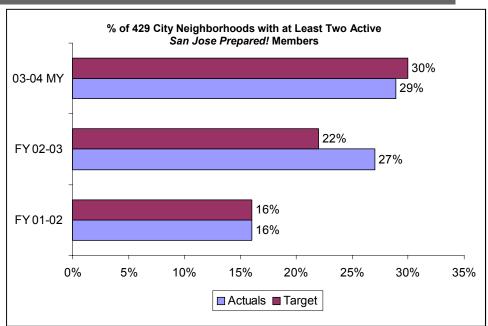

# Public Safety City Service Area

#### Outcome 1 - Public Feels Safe Anywhere, Anytime in San Jose (Cont'd)

#### Key Messages

- Responding to emergencies continues to be the most significant core service component for Public Safety. Response time is an industry standard measure and allows San Jose to compare itself to other comparable sized jurisdictions, as well as measure our own abilities.
- In Police, response time contributes directly to the ability to solve certain types of violent crimes including Homicide, Rape, Robbery and Aggravated Assault. Clearance rates are an indication of our ability to gather information and to present the evidence which will result in a successful prosecution or closure.
- In Fire, response time indicators show there is a direct correlation between the timeliness of response and the ability to contain a fire to room of origin or to building of origin. Goals for containing fires to the room of origin and to the building of origin are being maintained.
- Contractual goals for the Emergency Medical Services portion of the response core service continue to be met.
- Field patient care for life threatening conditions such as asthma and acute myocardial infarction continue to produce positive patient outcomes. Asthma outcomes for 2003-2004 may reflect the seasonal nature of asthma attacks or the increased availability of over-the-counter medications. Collection of data in the future may further indicate a new trend in this area.
- The economic downturn continues to delay implementation of some of the key components of the Police and Fire master planning strategies.
- San Jose continues to be the "safest big city in the nation". The recent perception that gang-related crimes have increased is not supported by the data. However, it should be noted that the level of residential burglary has increased 20% over this time last year. Given the need for budget reductions and the priority given to crimes against persons, it is anticipated that the crimes against property will increase over previous levels.

#### Outcome 2- Residents Share the Responsibility for Public Safety

"Increased risks, coupled with no growth in emergency response capabilities, reinforces the need for increased resident preparedness."

#### Key Messages

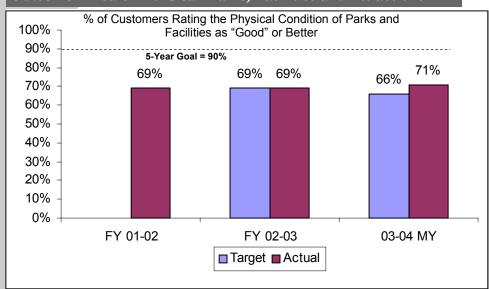

- Self-sufficiency is a cost-effective means of mitigating some emergency impacts. Outreach to the community members with limited English competency is especially important, but consumes considerable resources for both translations and creating culturally appropriate materials and presentation. Socio-economic factors also make active emergency preparedness difficult for many community members.
- The ongoing potential threat of terrorist activity will necessitate increased vigilance and self-reliance on the part of the public. However, the public is suffering from disaster fatigue and attendance at public meetings on emergency management and terrorism preparedness has dropped significantly from the period right after the terrorist attacks of 2001. New and more costly methods of advertising and outreach have to be undertaken to try to increase community preparedness.

# Recreation and Cultural Services City Service Area

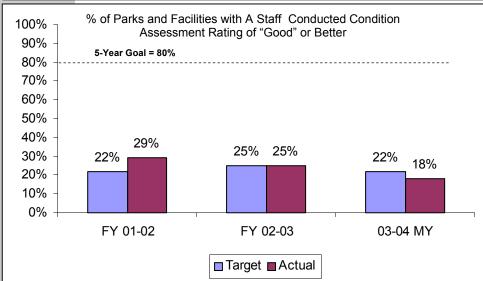

#### Mission:

To serve, foster and strengthen community by providing access to lifelong learning and opportunities to enjoy life.

#### Outcome 1 - Safe And Clean Parks, Facilities and Attractions

"While residents' perception of Park conditions remains high, diminishing resources continue to negatively impact park facilities infrastructure."

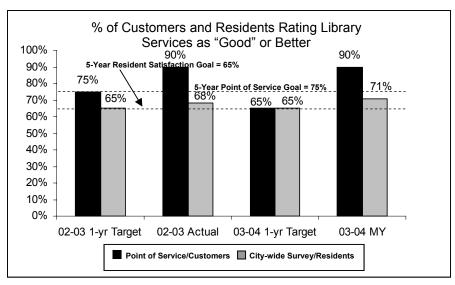

#### Key Messages

Newly developed or enhanced park acreage received only partial funding in 2002-2003 and no funding in 2003-2004. With the addition of new park acres and improvements it was anticipated that delivery of maintenance services throughout the Park system would be impacted. Results from the Citywide Survey measuring "% of residents that rate the physical condition of parks and facilities as "good" or better" indicates that this Outcome exceeded the current year target. The success of this measure stems in part from the implementation of the Parks Bond projects and reflects an aesthetic view from the customer's perspective.

It is important to note that during the last two years, park inventory has grown 3% while authorized staffing has decreased 5% and non-personal resources have decreased 16%. Failure to keep pace with the needs of the park infrastructure through the strategic allocation of appropriate resources will negate the success of our current capital program. The chart above illustrates another measure, "% of parks and facilities with a staff conducted condition assessment rating of "good" or better". This measure focuses on a detailed assessment of each asset at each park. The decline in this measure is the result of fewer staff resources to maintain the growing infrastructure. The 5-year goal of having 90% of customers and residents rate the physical condition of our parks and facilities as "good" or better will be adversely impacted by any reduction in the maintenance funding.

# Recreation and Cultural Services City Service Area

#### Outcome 2- Vibrant Cultural, Learning and Leisure Opportunities

"The general public and library users are indicating greater-than-projected customer satisfaction with Library services."

#### Key Messages

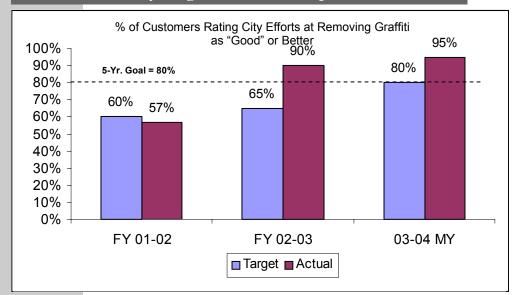

The achievement of this year's targeted service levels has been greatly dependent on the successful allocation of staff to operate expanding facilities with no increases in positions. Specifically in the Library Department, both the customer and resident surveys have demonstrated the CSA's ability to provide services rated "good" or better at the main King and branch libraries. The Library 2003-2004 1-year target for customer and resident satisfaction of 65% was not only met, but also exceeded: 90% for customers and 71% for residents.

The opening of the Dr. Martin Luther King, Jr. Library and maintaining the availability of services has been reflected in the survey results. The new King Library opened to rave reviews by the community, resulting in higher-than-anticipated traffic which saw the millionth visitor by the first of December, a full four months earlier than projected. While this success is exciting, it also indicates that the infrastructure will be experiencing greater wear-and-tear at a faster rate, requiring increased maintenance at an earlier time in the life of the building.

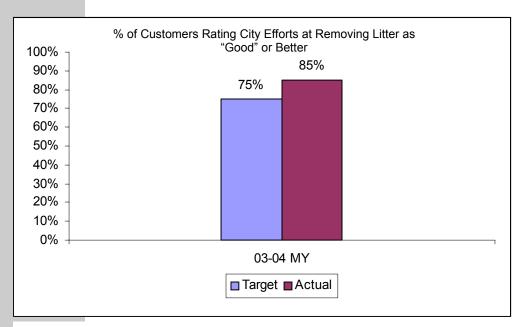

A major concern of both the Library and PRNS will be the potential for significant decline in customer satisfaction should serious cutbacks in departmental operations be necessary in 2004-2005. It is projected that customer satisfaction levels may drop by upwards of 30% at precisely the same time as we go to the local electorate for a parcel tax measure to continue library-designated funding to replace the Library Benefit Assessment District which sunsets in 2005.

# Recreation and Cultural Services City Service Area

#### Outcome 3- Healthy Neighborhoods and Capable Communities

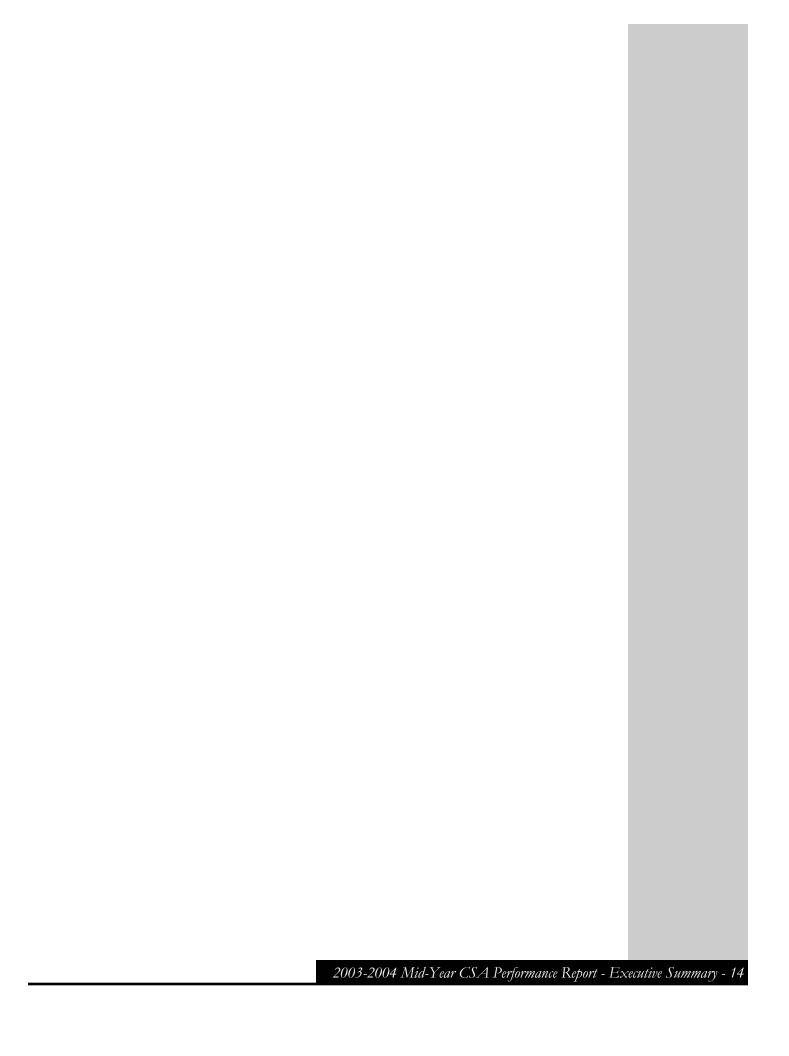

"Even in a year of economic stress when graffiti incidence may be on the rise the program has been able to exceed their 2003-2004 one year targets and has exceeded our five year goal for the past 18 months."

#### Key Messages

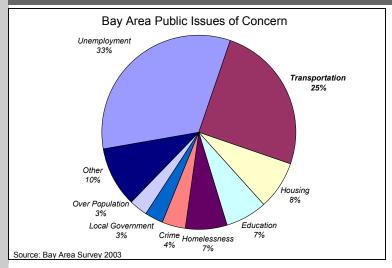

Establishing San Jose as a "Graffiti-Free and Litter-Free City" continues to be a priority for this CSA and continues to be a highly successful program. Even in a year of economic stress when graffiti incidence may be on the rise the program has been able to exceed their 2003-2004 1-year targets. This accomplishment has taken place because of the dedication of the Anti-Graffiti staff and the Volunteer base removing the tags in a timely manner and thus, dissuading future tagging.

The Anti-Graffiti Program has incorporated the new Anti-Litter Program and has been successful in cleaning up the litter hot spots. There are 10 litter hot spots per council district that are measured annually and because of the successful eradication of litter the program has added 5 more sites per council district. The % of Litter Hot Spots rated a 1 (no litter) or 2 (slightly littered) based on the Keep America Beautiful Index 1-year target is 75% and the mid-year 2003-2004 result is 85%. These programs are heavily dependent on the volunteer base and proactive removal of graffiti and litter. Retaining these results in an environment of reduced resources will be a challenge.

To establish City transportation policy and to implement that policy by planning, building, operating, and maintaining needed transportation systems.

#### Outcome 1 - Viable Choices in Travel Modes

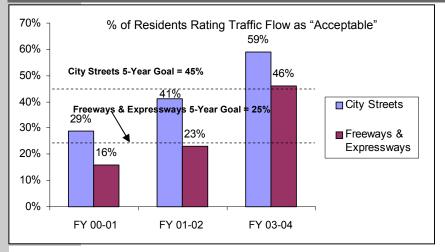

"Transportation remains a high priority in the Bay Area, second only to unemployment"

#### Key Messages

Transportation remains a high priority in the entire Bay Area, second only to unemployment in the recent Bay Area Public Issues of Concern survey. Transportation-related issues were once again the highest single issue of concern for San Jose residents in the latest survey. Unfortunately, funding in the Traffic CIP is at an 8 year low, limiting the ability to build transportation assets. Nonetheless, ensuring viable choices in travel modes remains a key goal of the CSA, and many projects are underway this year to support that effort. Support to the VTA and other regional partnerships to facilitate BART to San Jose remains a priority transportation project for the Region and City. In addition, key investments are being made to enhance regional transit and highway systems, improving arterial streets and bridges, expanding bicycle and pedestrian facilities, and enhancing intersection safety and efficiency for all travel modes.

#### Outcome 2- Convenient Commute to Workplace

"Residents are experiencing reduced traffic on City streets and freeways"

#### Key Messages

Residents are experiencing reduced traffic on City streets and freeways as evidenced by the dramatic increase in satisfaction over traffic flow. However, this improvement is temporary, due mostly to the current unemployment rate and resulting reduction in the number of drivers on the road, particularly during commute times. The CSA recognizes that a convenient commute is a key element of economic revitalization, and continues efforts to time signals and operate intelligent transportations systems (ITS) to retain as much of the improvement in traffic flow as possible after the economy rebounds and the number of commuters increases. However, limited maintenance and operations funding for ITS impacts the ability to meet this goal. In addition, the hiring freeze resulted in vacancies this year, which is reducing the number of signal timing improvements handled within cycle time down to 72% from last year's 80% rating.

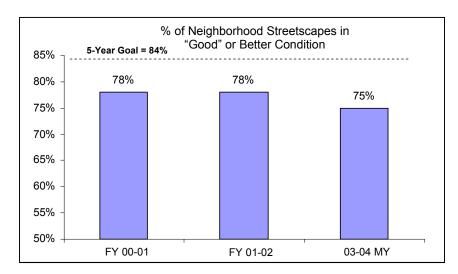

# Transportation City Service Area

#### Outcome 3 - Efficient Access to Major Activity Centers

#### Key Messages

Recent resident survey data showed that 74% of customers rate access to the airport as "good" or better, and 78% rated access to Downtown as "good" or better. Efforts to improve the access to major activity centers include event traffic management at the Arena and other major activity centers, signal timing to and from the Downtown, Airport, and major shopping centers, and significant capital projects such as the 87 Freeway and the Coleman/880 interchange. Work under this outcome also supports the strategic initiatives for economic development, particularly those regarding creating a global gateway through the airport and the most livable community through improving access.

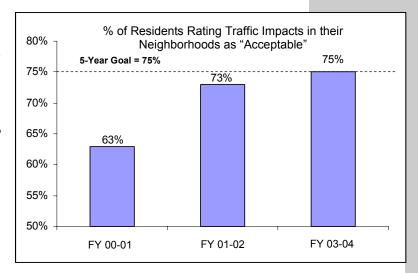

#### Outcome 4 - Transportation Assets/Services that Enhance Community Livability

"Declining investments in infrastructure maintenance are reflected in flat or lower condition ratings just as large investments in traffic calming improvements are reflected in increased resident acceptance of traffic impacts."

#### Key Messages

The combination of shrinking resources and evergrowing inventories has had a very visible effect on infrastructure maintenance and the overall condition of City infrastructure assets. In the first six months of the fiscal year, internal condition ratings have already fallen in neighborhood streetscapes (78% to 75% in "good" or better condition) and traffic control devices (74% to 70% in "good" or better condition). Street pavement conditions are expected to fall from 90% to 87% by June 2004. The most recent City Survey indicates that residents' ratings of these assets are flat or declining as well, mirroring the decline in condition ratings. Preventive maintenance activities are far below optimal and face further reductions in 2004-2005, leading to further deterioration of infrastructure assets. Some assets, particularly street pavement, suffer long-term effects from the lack of preventive maintenance, as further condition deterioration will require costlier treatments in the future.

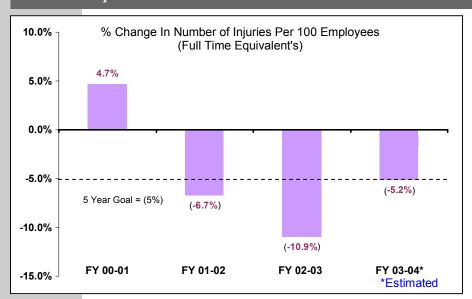

Traffic Calming efforts are being appreciated by citizens as evidenced in the customer survey in which 75% of citizens rated traffific impacts in their neighborhood as "acceptable" or better, up from 63% three years ago. Staff expects to complete approximately 1,900 Traffic Calming requests this year, although the timeliness of completing those requests will decline from previous years due to staffing vacancies resulting from the hiring freeze and cost management plan. Next year these vacancies are proposed for elimination, which will permanently reduce the timeliness of response to customer requests for service, as well as the number of requests completed. A corresponding decline in customer ratings can be expected.

#### Mission:

To effectively develop, manage and safeguard the City's fiscal, physical, technological and human resources to enable and enhance the delivery of City services and projects.

Note: This Executive Summary reflects progress toward further consolidation of the City's Strategic Support functions as directed by City Council. A new, unified mission statement and four new outcomes are presented here for the first time. Work is continuing on consolidation of strategic goals and performance measures for the unified City Service Area. Therefore, detailed performance information is still being reported against goals and targets as they appeared in the 2003-2004 Adopted Budget.

# Outcome 1- A High Performing Workforce that is Committed to Exceeding Customer Expectations

"The number of injuries continues to decline as a result of working collaboratively with line departments."

#### Key Messages

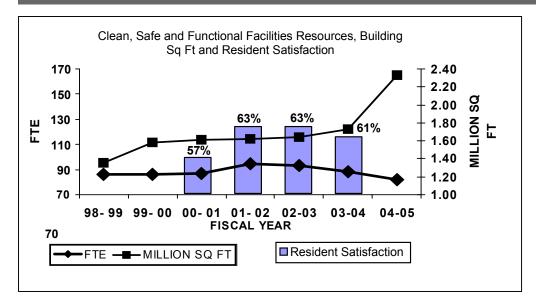

One of this CSA's contributions to a high-performing workforce is to minimize absenteeism and time lost due to injuries. Employee Services' Health & Safety Program includes the workers' compensation program and various citywide safety initiatives.

The number of injuries per 100 employees (FTE's) has continued to decline from 22.8 in 2000-2001 to an estimated 17.9 in 2003-2004, an overall decrease of 21.5%. The continuing decline has been the result of working collaboratively with line departments to implement a proactive safety program and a workers' compensation cost containment pilot program. The main focus of these two programs is to establish a safety culture beginning with top management to directly impact the safety and health of employees.

Our efforts in reducing the number of injuries have led to a leveling of overall program costs, even though claim costs have increased. The cost of claims for the first six months of this fiscal year is \$9.34M as compared to \$9.06M for the first six months of last year, an increase of \$288,000, or 3.2%. Prior to this reporting period workers' compensation costs increased at a double-digit percentage rate. With little control over accelerating medical costs and higher benefits mandated by workers' compensation laws, the City's focus continues to be developing work environments and a management and staff mindset that is focused on accident and injury prevention. The downward trend in claims is important since approximately 80% of current year claim costs are related to prior years' claims. The strategy on reducing workers' compensation costs mandates that the City continue to reduce claims while effectively mitigating past claims and costs.

Overall, success is being achieved in the Health & Safety program, however, continued budgetary pressure threatens the very investments focused on minimizing injuries.

# Outcome 2 - Safe and Functional Public Infrastructure, Facilities, Materials and Equipment

"The New Civic Center will add 530,000 square feet of new building space inventory. This is a 30% increase."

#### Key Messages

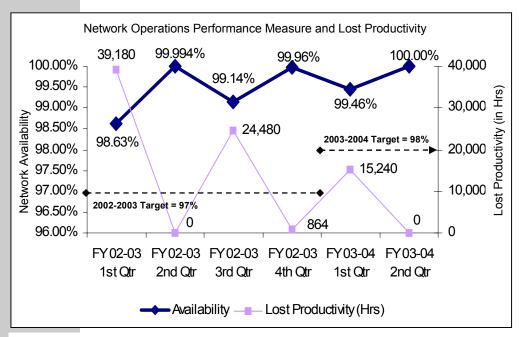

Despite the continuing economic downturn, the City's Capital Improvement Program (CIP) remains strong with a 2004-08 budget of approximately \$4.0 billion. Of the more than 580 projects included in the 2004-08 CIP, 384 are currently active for 2003-2004, with 332 of these projects completed or on schedule. In addition, staff expects to award a total of 131 construction contracts during FY 03-04.

However, the projected \$85 million shortfall in the General Fund in 2004-2005 will have significant impacts on the CIP. General Fund tax revenues continue to decline mandating that the CSA align project delivery with our ability to meet projected Operations and Maintenance (O&M) expenditures. Projects with large O&M costs to the General Fund may have to be deferred to later years. Please note that the mid-year 2003-2004 measure for "% of CIP projects that are delivered within 2 months of approved baseline schedule" is 76% versus a target of 85%. Regulatory agency agreements and permits, environmental issues, extended community involvement, contractor issues, land acquisition, or budgetary issues are the primary causes for delays in projects. Staff is aggressively seeking ways to improve performance by FY end.

The addition of new or rehabilitated building facilities through the City's aggressive capital program has provided for new building space and also served to reduce deferred maintenance needs throughout the existing building facility inventory. The most recent General Services staff assessment of facilities "condition" indicates that 32% of the facility inventory is rated at "good" to "excellent" condition. In addition, the citywide community survey measuring "% of customers who rate the condition of existing facilities as "good" or "excellent" exceeded the current year target (61% vs. a 57% target). This success stems from the implementation of the Library, Parks, and Neighborhood Security Act Bonds projects and reflects both the aesthetic view from the customers' perspective and the internal staff assessment.

It is important to note that in the last 3 years the public building inventory has grown to the current total of 1.73 million square feet and that the New Civic Center will grow the inventory by an additional 30%. At the same time, the operating budget reductions of the past two years have reduced the resources used to maintain and support these key infrastructure investments. Failure to keep pace with the maintenance needs of the growing inventory will negate the successes of our current capital program and replicate and expedite the need for a large capital reinvestment. With this in mind, this Outcome will focus on strategically using current limited resources, asking clients to work on the delivery of high priority projects and continuing to champion the identification and mitigation of the O&M costs associated with the Capital Program.

#### Outcome 3 - Effective Use of State-Of-The-Art Technology

"Network availability target was consistently exceeded, however new City Enterprisewide infrastructure will require essentially 100% network availability."

#### Key Messages

For the first half of FY2003-2004, network availability exceeded the current target of 98%. Maintaining availability of core information technology systems like the network is a mission critical function of this CSA outcome. For example, the difference between availability at 98.63% and 99.99% represents approximately 39,000 quarterly hours of time in which staff was unable to access the City's network, resulting in no use of systems like email, intranet, MS Outlook and other applications required for conducting business in the City's current work environment. Staff will evaluate raising this target for FY2004-2005 in preparation for the new requirements and demands on the City's network infrastructure at the New Civic Center.

Network availability has been affected by recent budget reductions. Spare part inventories have been reduced mandating that replacements for failed network components be ordered and delivered upon need. This has resulted in longer times to restore the network. In addition, the existing network is meeting the end of its life cycle, resulting in lower reliability and response time while customer demands on the system are continually increasing. At the same time, lack of timely and consistent procurement and implementation of anti-virus software on all equipment that represent possible points of entry for virus or other network intrusion has resulted in increased network downtime.

Faced with limited resources, the desired outcome must be on planning and implementing the new technology for the New Civic Center. Integrating, consolidating and leveraging existing information technology resources are key strategic outcomes of the New Civic Center technology planning effort. These outcomes are in direct alignment with the strategic initiative in the Economic Development Strategy to "Make San Jose a Tech Savvy City; Lead the Way in Using Technology to Improve Daily Life", and support the customer service delivery model and associated organizational transformation envisioned for the New Civic Center.

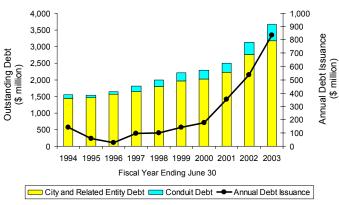

The criticality of the performance target for network availability will be amplified with the implementation of the Voice Over Internet Protocol (VOIP) network and voice services in the New Civic Center. The fact that phone services will be provided via the network will drive the current network availability performance measurement goal of 98% to 99.9999%. Although currently, data network availability does not meet this target, the City's telephone service availability performance measurement and actual performance is 100%. Mitigating the risk of the VOIP network not being available requires the appropriate design and investment in the network infrastructure.

# Outcome 4 - Sound Fiscal Management that Facilitates Meeting the Needs of the Community

#### Key Messages

By maintaining the City's excellent credit ratings, the City continues to provide essential public facilities to the community with low financing costs, saving the City millions. The City has been making significant capital investments in public facilities such as parks, libraries, public safety and its new civic center. These projects are consistent with implementation of the City's "Decade of Investment," through a \$4.05 billion 2004-08 Capital Improvement Program, of which approximately 65% is to be financed with bonds. This includes \$411.73 million in General Obligation Bonds not yet issued, but authorized by the voters of the City of San Jose for parks, libraries and public safety facilities. The chart below demonstrates the dramatic growth in the size of the City's debt portfolio along with the increase in issuance activity in each of the last ten fiscal years. As of June 30, 2003, the City (including related entities and multi-family housing debt [conduit debt]) had over \$3.6 billion in debt outstanding.

It is critical for the City to maintain its excellent bond ratings, which is a key factor in determining the City's borrowing rate (the City's cost of funds). Because the City has exercised sound fiscal management, even during the recent time of economic uncertainty, San Jose's bond ratings are the highest for cities our size in California. Our excellent credit ratings (Aa1 [Moody's] and AA+ [Standard & Poor's and Fitch]) have already saved the taxpayers over \$2.5 million over the life of the general obligation bonds issued to date, and are estimated to save the taxpayers an additional \$5.6 million over the life of the City's general obligation bonds authorized but not yet issued.

It should also be noted that another large California city recently had its ratings downgraded due to underfunding of pension costs, errors in its Comprehensive Annual Financial Report, and relatively low reserves. Due to this downgrade, that city will be paying more in interest costs on its bonds. The chart below demonstrates the strong credit characteristics of San Jose as compared to the medians for all California cities, as reported by Moody's Investors Service. San Jose generally compares favorably to the all California cities medians and compares more favorably when compared with other large California cities.

#### Comparison of San Jose Financial Position to All California Cities

|  | Moody's     |           |
|--|-------------|-----------|
|  | Median      | City of   |
|  | All Issuers | San Jose  |
| Total Gen. Fund Balance as % of Revenues (FY 2001-02)        | 45.9%       | 43.4%     |
| Direct Net Debt as % of Full Value (FY 2001-02) <sup>1</sup> | 0.3%        | 0.5%      |
| Per Capita Income (CY 1999)                                  | \$ 19,778   | \$ 26,697 |
| Median Family Income (CY 1999)                               | \$ 50,247   | \$ 74,813 |
| Assessed Value Avg. Ann. Growth FY 99-03                     | 8.1%        | 10.0%     |
| Taxable Sales Avg. Ann. Growth FY 98-02                      | 5.4%        | 2.2%      |

Outcome 3: Businesses consider the Airport as a partner in supporting the success of the regional economy

|  |    |   |                        | Prior                    | Year                | Currer                   | nt Year              |   |        |
|--|----|---|------------------------|--------------------------|---------------------|--------------------------|----------------------|---|--------|
| 5 Year Strategic Goals   |    | CSA Performance Measures  | 2003-2008<br>5-yr Goal | 2002-2003<br>1-yr Target | 2002-2003<br>Actual | 2003-2004<br>1-yr Target | 2003-2004<br>Mid-YTD |   | Status |
| Business passengers have a positive experience when using the Airport.   | 1. | % of business passengers rating the<br>Airport services as good or excellent,<br>based upon availability of amenities,<br>quality and costs.  | 90%                    | 55%                      | N/A*                | 55%                      | N/A                  | Business Passenger Survey was recently completed but data has not been fully tabulated and verified, Additional analysis should be complete by April 1, 2004.   |        |
| B. Provide facilities necessary to meet the needs of customers, as well as businesses that operate within the Airport. | 1. | % of business passengers rating<br>Airport services as good or excellent,<br>based upon service availability,<br>facility condition, and cleanliness.   | 90%                    | 65%                      | N/A*                | 65%                      | N/A                  | Business Passenger Survey was recently completed but data has not been fully tabulated and verified, Additional analysis should be complete by April 1, 2004.   |        |
|  | 2. | % of business passengers rating rental car services as good or excellent, based upon availability, quick return of rental cars, courtesy of rental car staff and reasonable rental car rates. | 90%                    | 58%                      | N/A*                | 58%                      | N/A                  | Business Passenger Survey was recently completed but data has not been fully tabulated and verified, Additional analysis should be complete by April 1, 2004.   |        |
| C. Cost to airlines of operating at the Airport is competitive with other airports in the region.                      | 1. | Airline cost per enplaned passenger.  | -                      | \$3.95                   | \$4.36              | \$5.09                   | EST \$4.70           | Mid-year cost per enplaned passenger is estimated to be \$4.70, this figure differs from the quarterly reported figure in IiR reporting because it is the 6 month cummulative total not a quarter by quarter report. This measure uses both current passenger levels and airline revenues to provide a cost per passenger that is used industry-wide to compare various costs at Airports. The decrease to landing fees charged to Airlines that took place effective October 2003 - effectively lowers the costs and makes SJC more competitive. |        |
| D. Provide adequate domestic air service to meet business passenger needs.   | 1. | % of corporate travel planners and<br>travel agents that feel SJC provides<br>adequate domestic air services to the<br>business passengers.   | 85%                    | 60%                      | N/A*                | 60%                      | 66%                  | Travel Planner and travel agent survey completed - data provided is annual total. Although the raw data has been tabulated, analysis of the data has not yet been completed. Analysis and comparisions are anticipated to be complete for the third quarter report.   | 0      |
| Provide adequate international air service to meet business passengers needs.  | 1. | % of corporate travel planners and<br>travel agents that feel SJC provides<br>adequate international air services to<br>the business passengers.  | 30%                    | 27%                      | N/A*                | 27%                      | 22%                  | Travel Planner and travel agent survey completed - data provided is annual total. Although the raw data has been tabulated, analysis of the data has not yet been completed. Analysis and comparisions are anticipated to be complete for the third quarter report.   | 0      |

At the direction of the Mayor's March 2003 Budget Message it was determined that consultant expenditures not related to the capital budget be suspended. Information necessary for this performance measure has traditionally been provided by a consultant survey and is not be available for 2002-2003.

|    |   | Airport Parkway entrance  | D                      | F                        | N/A                 | F                        | NA                   | should be available by April 1, and are anticipated to show significant improvement. Actual 2002-2003 ratings for entrances is not available but will be for the 3rd Quarter Report.  |        |
| C. | Strengthen communication with all stakeholders regarding the noise impact of operating the Airport. | % of noise complaints responded to<br>within one day.   | 100%                   | 100%                     | 98%                 | 100%                     | 96%                  | First quarter result were 97%, second quarter results are 96%. During the period it should be noted that workload associated with the change in the curfew impacted service levels. However, introduction of a new telephone system has allowed for improvements to customer service.   |        |
|    |   | % of customers rating the Airport response to noise issues as satisfactory or better  | -                      | -                        | New measure         | 100%                     | N/A                  | Survey is being developed and data will be available during 4th quarter.  |        |
| D. | Establish the Airport as a responsive and active participant in the local community.                | % of community organization leaders who<br>rate the Airport as an established and<br>active participant within the community. | 75%                    | 90%                      | N/A*                | 90%                      | N/A                  | Survey is being developed and data will be available during 4th quarter.  | _      |

<sup>\*</sup> At the direction of the Mayor's March 2003 Budget Message it was determined that consultant expenditures not related to the capital budget be suspended. Information necessary for this performance measure has traditionally been provided by a consultant survey and is not be available for 2002-2003.

<sup>\*\*</sup> Adopted 1 year Target was mistakenly 25 Acres rather than "0". 5.5 acres were treated in 2002-03 and the remaining acres should be treated in 2003-2004. However, the target should be "0" acres of incompatible land use acres.
